'SIMULATION' SUBJECT
OF UM SUMMER COURSES

MISSOULA--

Simulation and simulation techniques will be the subject of three different courses to be conducted by the University of Montana during the 1973 pre-session June 11-15.

The pre-session, initiated last year, is a five-day period for special programs and workshops which precedes the beginning of the regular Summer Session program June 18.

The three courses are being offered in business administration, education and political science through the UM Division of Extension and Continuing Education.

The first course, entitled "Vocational Office Education Simulation Techniques," will consist of a miniature simulation in business education. Dr. Donald B. Koeppen, instructor of the three-credit course, said participants will review organizational structures in business education, study business and office-type positions, develop job descriptions and patterns of work flow, prepare individualized instructions and create appropriate business forms.

The class will be from 8 a.m. to noon in room 585 of the UM Business Administration Building.

"Games and Simulations in Instruction" is the title of the second course, which may be taken for two undergraduate or graduate credits in education. The purpose of the seminar is to examine the rationale for employing games and simulations in instruction and to illustrate by participation the use of games and simulations on a variety of grade levels and subject fields. Participants will learn the structure of effective games and simulations and acquire a selective, current bibliography of quality games and simulations.

Geneva Van Horne will instruct the course which is scheduled for 9 a.m.-noon and 1-3 p.m. June 11-15.

SIMULATION SUBJECT--2

The UM political science department will sponsor the third course entitled "Inter-Nation Simulation." Offered for three credits, the class will consist of students representing the major features of the international political system. The emphasis of the course will be on foreign policy, decision making and crisis management. Instructors will be Dr. Robert E. Eagle, Peter Koehn and Louis D. Hayes.

Registration for the pre-session courses will be conducted at the first class meeting on June 11, and the enrollment fee of \$16 per credit hour will be collected at that time.

Anyone desiring additional information may contact the Extension Division by phoning 243-5293.
